Sprint 6 Acceptance Checklist

Release verification document

Acceptance Gates

Gate	Acceptance Requirement	Status
1	92-company clustering output exists	PASS
2	Five KMeans clusters are generated	PASS
3	Cluster archetypes are profiled	PASS
4	Cash-flow intelligence output exists	PASS
5	92 unique companies represented in core outputs	PASS
6	NLP pros/cons output exists	PASS
7	Company tear sheets generated	PASS
8	92 company tear sheets verified	PASS
9	Sector reports generated	PASS
10	10 sector reports verified	PASS
11	API test suite exists	PASS
12	ETL test suite exists	PASS
13	KPI test suite exists	PASS
14	Automated pytest execution completed	PASS
15	67 pytest tests passed	PASS
16	No pytest test failures	PASS
17	Dashboard/report artifacts exist	VERIFY
18	Performance/load-test evidence verified	VERIFY
19	Analyst guide generated	VERIFY
20	Acceptance checklist generated	VERIFY

Evidence Summary

Evidence	Observed Result
Company reports	92 HTML files
Sector reports	10 HTML files
Automated tests	67 passed
Test failures	0

Evidence	Observed Result
Pytest warning	1 dependency deprecation warning
Cluster output	company_clusters_v4.csv present
Cash-flow output	cashflow_intelligence_v4.csv present
NLP output	pros_cons_generated.csv present
Report generator	scripts/report_generator_v4.py present

Final Sign-Off Criteria

- All 20 acceptance gates must have evidence.
- No functional pytest failures are permitted.
- All expected company and sector reports must be present.
- API health and endpoint behavior must be verified.
- Dashboard availability and load performance must be verified.
- Analyst documentation must be present in docs/.
- The acceptance checklist itself must be archived with the release.

Current Conclusion

The available evidence confirms substantial Sprint 6 completion: the core analytical outputs exist, 92 company reports and 10 sector reports have been generated, and the automated test suite reports 67 passed tests with zero failures. Gates marked VERIFY must be checked before declaring final sign-off.
