10-Year Revenue and Net Profit

ROE and ROCE Trend

Pros • Revenue growing at above 15% CAGR over 5 years reflects strong business momentum. • Very high interest coverage ratio reflects negligible financial stress from debt servicing. • Operating profit margin above 25% indicates strong pricing power and cost discipline.	Cons • Negative free cash flow raises concern about cash generation quality. • Return on capital employed below 10% suggests the business is generating limited returns on invested capital. • Negative net cash flow indicates that total cash outflows exceeded inflows during the latest period.
